

Drinking Water Sampling

**LEAD & COPPER**

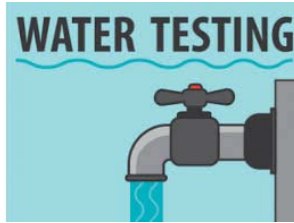

**The Franklin Township Water Department is looking for water customers who are willing to take part of the Township's Lead and Copper Sampling Plan.**

The samples are being collected to determine the lead and copper levels in your tap water. This sampling effort is required by the U.S. Environmental Protection Agency and the New Jersey Department of Environmental Protection under the Federal and State Safe Drinking Water Acts, and is being accomplished through collaboration between the public water system and their consumers (e.g. residents). These samples help assess the need for, or the effectiveness of, corrosion control treatment to minimize a customer's exposure to lead and/or copper through drinking water. Results from this monitoring effort and information about lead will be provided to you.

The customer will be required to fill a one (1) liter bottle with tap water which will be dropped off and picked up by the Township.

Please complete all information requested:

Name: \_\_\_\_\_

Property Address: \_\_\_\_\_

Email Address: \_\_\_\_\_

Phone Number: \_\_\_\_\_

Years Living In Home: \_\_\_\_\_

Approximate Year Home Built: \_\_\_\_\_

Internal Home Plumbing Type (Check One):

- Lead
- Iron
- Copper
- Plastic (Poly/Pex)
- I don't know

---

I would like my property to be considered to be part of the Township's Lead and Copper Sampling Plan. I understand, if I meet the criteria, that I will be required to provide two samples per year in the bottles provided by the Township and collect the sample with the included instructions.

Signature \_\_\_\_\_ (Please Type Name as signature)

All residents will be notified if they have met the minimum criteria for the Sampling Plan.
